Transformative Technologies and Their Impact on the Workplace

FOS: Technology/1.0 RCH/1.0 CPE credit

Transformative technologies are defined as tech that can facilitate mental health, emotional wellbeing, and enhanced human thriving. These have also been less optimistically labeled as disruptive innovation/technology. Today, we are beginning to feel the impacts of three transformative technologies within our society: big data, artificial intelligence, and blockchain and cryptocurrency. This session will introduce these transformative technologies and examine their impact on the workplace.
